Roof Drain Seals

DESCRIPTION :

Roof Drain Seal is used to seal a retrofit roof drain to an existing drain pipe rapidly and efficiently.

FEATURES & BENEFITS

- Seals are made with tough nylon flanges and stainless steel screws that provide the necessary strength torque to compress the EPDM rubber gasket.
- The flexible rubber is expanded by tightening the internal stainless steel screws thereby stopping water leakage at the connection in the event of water backup in the drain.
- Tough nylon flanges and 4 stainless steel screws provide the necessary strength to prevent "spinning" seal during installation.
- Available in 3", 4", 5", and 6" sizes.

PRODUCT LIST:

Roof Drain Seals

ITEM NO:	DESCRIPTION	PRODUCT CODE
1	ROOF DRAIN SEALS—U-flow Seal 3"	U300
2	ROOF DRAIN SEALS—U-flow Seal 4"	U400
